BRIDGING ART AND TECHNOLOGY

Driven Fullstack Developer with experience in fast-paced, team-oriented environments. Proficient in React.js, Ruby on Rails, and SQL. 5+ years of experience with customers and team-oriented work. Advanced work in Graphic Design and Design Software. Excited to learn new skills and build successful applications!

TECHNICAL PROJECTS

Double Cryptography   video demo | github front end | github api

Created a browser-based game using Ruby on Rails for the back end and React for the front end. Users log in to solve interactive puzzles with the help of a detective.

- Designed and wrote front end using React and React-konva
- Implemented RESTful API to manage game state and persist game data
- Illustrated game graphics through Figma and used GSAP to manage animations

Knight Quest   video demo | github

Paired project CLI game designed using Ruby on Rails and SQL. Users can choose a knight to journey with or create a new one. Users encounter classic Quest game situations and must find solutions with their knight.

- Communicated with partner to ensure functionality.
- Addressed user interaction and implemented safety measures.
- Structured Rails back end to save and retrieve knight data.

EXPERIENCE

Mack & Associates LLC   12/2018 – 11/2019

Data Analyst/Office Administrator

- Distributed sensitive data to staff of over 200 in multiple offices.
- Reviewed and revised errors in paperwork to avoid bugs in office wide software.
- Authored guidebook on front-desk use and office distribution to increase clarity and productivity by 100%.

Starbucks   02/2020 – 02/2021

Barista

- Increased productivity by 90% through clear communication to team.
- Assessed errors and facilitated solutions directly with customers.
- Conducted nightly inventory review and guided team on restock.
